19th U21 Shore Angling World Championship
28th U16 Shore Angling World Championship
Latina 12 - 19 October 2019

On my name and on behalf of the Italian Federation of Sport Fishing and Underwater Activities, which I am honoured to chair, I am delighted to express my greetings to all participants at this Shore Angling World Championships U16 and U21, which are going to be held from 12 to 17 October in Latium, in an area rich of history and, in particular, in the Province of Latina, which vaunts a cultural, touristic and sports sea tradition.

I am sure that the young athletes of all attending Nations, which will meet together with the managers, the technicians and the stewards, will join the opportunity of appreciating the beauties of these places and the hospitality of all those who have expressed all their efforts for organizing this big sport fishing event.

So, I am especially delighted to extend my sincere welcoming to all of you in the esprit of living together some quite days.

Finally, I wish to thank the FIPSAS Provincial division of Latina, that assumed the task as organizing Committee of these World Championships, the Mayors of the towns that are hosting our young anglers, the political, religious and administrative authorities and all journalists of local and national media for their support.

Last but not least, I would like to remark that the pivot of this international competition is the participation of young athletes. This is the reason why I wish to remind to all participants, besides wishing them the best sport successes in the forthcoming competitions, that whatever will be the final result, a great award will be having participated at a such prestigious sports event.

Prof. Ugo Matteoli

FIPSAS President

19th U21 Shore Angling World Championship
28th U16 Shore Angling World Championship
Latina 12 - 19 October 2019

I am very pleased to present the U16 and U21 Shore Angling Championships to be held in the municipalities of Terracina, Sabaudia and Latina.

I am sure that the local areas, the sea and the organisation will live up to our expectations and those of all participants.

Shore Angling is a very popular sport in Italy, as it allows the athletes to be in close contact with the surrounding natural environment, beaches and fish fauna. Shore Angling is also a sport much loved by young people, and the healthy interest that it arouses in them must certainly be cultivated and stimulated. Competitiveness also gives young people the opportunity to engage with their peers both from a sporting and human point of view, and these events truly enhance values such as socialization and sharing.

These are the reasons why I firmly believe in them and I keenly welcomed the project to host this important Championship in the Province of Latina.

I would like to thank the local authorities and the FIPSAS local structures for their organisational support, which is essential for the success of the event.

I look forward to October because the days spent with our young people provide the best boost of enthusiasm that we leaders can rely on in order to continue to work in the best interest of the Federation.

Maurizio Natucci
President of Surface Fishing Sector

19th U21 Shore Angling World Championship
28th U16 Shore Angling World Championship
Latina 12 - 19 October 2019

The "**World Fishing Championship - Latina 2019**" Committee, in collaboration with F.I.P.S.A.S. is pleased to invite your Federation to participate in the 19th U21 Shore Angling World Championship and the 28th U16 Shore Angling World Championship to be held from 12 to 19 October 2019 in the province of Latina on the beaches of Sabaudia, Terracina and Latina.

SABAUDIA

Sabaudia, a town founded in 1934 together with the Park, is located on the shores of Lake Paola in the heart of the Circeo National Park. The town centre showcases interesting architectural aspects that make it one of the best examples of Italian rationalist architecture. Particularly worth visiting is the royal chapel commissioned by Queen Margaret following the death of her husband Umberto I, to whom it was dedicated, and which was originally located inside the Palazzo Margarita in Rome. The long **coastal strip**, made up of dunes and beaches, represents one of the most visited and delicate environments of the entire Park area. The dunes consist of a set of very interesting ecosystems, which often feature lively blooms. To preserve this environment, it is necessary to respect it avoiding damage and using the appropriate wooden walkways to access the beach.

The wetlands are the largest reservoir of biological diversity in the Circeo National Park, with the presence of over 250 species of birds, as well as fish, amphibians, reptiles, mammals. For this reason, they have been included in the list of 'wetlands of international interest' (Ramsar).

The **State Forest of Circeo** is the last strip of the ancient forest of Terracina, reclaimed in the 30s. It contains an extreme variety of habitats, including the periodically flooded "*Swimming Pools*" which, in addition to hosting very special species, recreate the charm of the swamp. In the seventies, due to its historical and environmental significance, it was declared a "**Biosphere Reserve**" - **UNESCO MAB programme**.

Latina 12 - 19 October 2019

TERRACINA

Terracina, is located in the countryside of the Pontine marshes at the southern edge of the plain itself, south of the promontory of Circeo, near the mouth of the river Amaseno, on the Tyrrhenian coast (Gulf of Gaeta). The town runs from an extension of Monte Sant'Angelo, where the town centre lies, up to the Circe promenade. The cliff of Pisco Montano clearly marks the southern boundary of the town's residential area.

Latina 12 - 19 October 2019

LATINA

Latina is located in the heart of the Pontine Marshes, in a largely flat territory. The city centre is located a few kilometres (about seven) from the Tyrrhenian Sea along Via del Lido up to Latina-Lido, the city's sea area, with its promenade and the beaches of Capoportiere, Foce Verde and Rio Martino. It is about 15/20 km from the Lepini mountains. Part of its territory is part of the protected areas of the Circeo National Park, where Lake Fogliano is also located, marking upper northern strip.

Latina 12 - 19 October 2019

Sabaudia, whose coasts are characterised by white sand dunes and Mediterranean scrubland, against the background of which stands the awesome profile of Circeo Mountain.

The long beaches continue north to **Latina**, featuring outlets that connect the sea to the coastal lakes surrounded by forests and swamps, making up the very heart of the **National Park of Circeo**.

To the south, beyond Circeo Mountain, there lie the beaches of **Terracina**, while the plain ends with Monte Sant'Angelo, on which the Temple of Jupiter Anxur dominates.
